Brand New, Could Never Be Heaven

Do you know the words that make the hidden door open?
Can you speak my secret name and fix me?
I have no heart, I have no brain
Lord I have no courage
Can you get me home again?

Could never be heaven without you
Could never be heaven without you
Never be heaven without you

I was drowning in the lake dammed
Over a dead mining town
The cars and the homes lay still in the water
The deeper I sank, the less I died
The trees swayed, slower the the tide
There were people I love below me singing

And all of the songs were about you
And all of the songs were about you
And all of the songs were about you

Winds will be heard
Swimming circles in the church
A cardinal fair says "God is dead"
Well said
Get out of my head
Get out of my head
Get out of my head

You are not alone
We are not separate
My daughter's shoulders are my shoulders
My son's hands my hands
My wife's heart my own heart
I've heard the outer darkness is really nice this time of year

Could never be heaven without you
Never be heaven without you
Never be heaven without
It'd never be heaven without you
Never be heaven without you
Never be heaven without you
