

Angel Olsen, Sister

I saw it in her eyes
All it wasn't what she said
She came together like a dream
But I didn't know I had
From the sleeping life I lead
All the colors I've seen
I can only recognise
The brighter one in front of me
All the truth I thought I've learned
And then it finally came along
Turned around and it's there
All the love I thought was done
I want to know you
I want to show you
I want to be there
I want to see her
Piece us together
Know it's forever
Show me the future
Tell me you'll be there
I want to go where
Nobody knows fear
I want to follow
My heart down that warren

Everywhere I go
I can see your face
I haven't gone it once
It's the way I see this place
And though this blessing was a curse
Before I opened up my heart
You've learned to take it as it comes
You fall together, fall apart
I want to know you
I want to show you
I want to be there
I want to see her
Will you gather
Pieces together
Know that this wild ride
Will go on forever
I want to live life
I want to die right
Next to you
Next to you
Next to you

All life without a change
All life without a change
All life without a change
All life without a change
All life without a change
All life without a change
All life without a change
