

# benny blanco, Marshmello & Vance Joy, You

In the moments when i hear my voice  
But don't feel like myslef  
Wish i could hold you  
It's only you  
In the moments  
When i walk thes city streets with someone else  
I wish i told you  
It's only you

You, only you  
When the nights is over out of all the places i could choose  
I'll go to you, only you  
Feel you're just below the Surface, darling  
All i wanna do is go to you

I go to you  
I go to you

There were Times when you would reach out foe a little more of me  
Now i can see how much you hurt when i stood still  
But i am learning what it;s like to open up a different side  
Cause wehn something hurts this much i know it's real

You, only you  
When the nights is over out of all the places i could choose  
I'll go to you, only you  
Feel you're just below the Surface, darling  
All i wanna do is go to you

I go to you  
I go to you

Feel you're just below the Surface, darling  
and i wana do i go to you

I go to you  
I go to you  
I go to you  
I go to you
