# Cigarettes After Sex, Dark Vacay

In summer I'm living on pills and lines
With someone I love, I don't really like
Been sleeping on the tile and keeping out the light
Then sipping Château Lafite Rothschild

So come on, come on, dark star
Been loving you and I can't get enough, dark star
We don't need Brazzers

Feel the world around you
Feel the world surround you
Feel the world around you
Feel it all around you crash

With summertime liquor at 5 o'clock
Been drinking too heavy on Adderall
I listen to the last message that you left
Then the voice from the suicide hotline

So come on, come on, dark star
Been loving you and I can't get enough, dark star
We don't need Brazzers

Feel the world around you
Feel the world surround you
Feel the world around you
Feel it all around you crash

Feel the world around you
Feel the world surround you
Feel the world around you
Feel it all around you crash and fall

Crash and fall
Crash and fall
