Coldplay, Coloratura

Coloratura
We fell in through the clouds
And everyone before us
Is there welcoming us now
It’s the ened of death and doubt
And loneliness is out

Coloratura
The place we dreamed about
The melodies inside yourself
And love come pouring out
And everyone’s allowed
We’re feathered by the crowd

And up there in the heavens
Galileo and Tose pining for the moon
Know it’s a slow burn
Through pioneer and helix
