Cyrus Villanueva, Stone

I should have known
From your voice alone
That you're gonna mess me up
Too much pleasure like a sugar rush

I should have guessed
From those cherry lips
That you're gonna leave your mark
Never had a kiss that hits so hard

And I'm feelin' drifting over you
You got this hold on me
And you, yeah you make it hard to breathe
But it just don't bother me
But it just don't bother me

I'm a stone in your river
Rolling to wherever
I drown just a little
I drown just a little
I'm a stone in your river
Every night I'm with you
I drown just a little
Deep down in you

I should've know watching you dance alone
But I could never get enough
Of your body looking like that, love

I could have guessed from your silhouette
That we'll gonna rub real fast
Oh, baby we can make it last

And I'm feelin' drifting over you
You got this hold on me
And you, yeah you make it hard to breathe
But it just don't bother me
But it just don't bother me

I'm a stone in your river
Rolling to wherever
I drown just a little
I drown just a little
I'm a stone in your river
Every night I'm with you
I drown just a little
Deep down in you

I drown just a little
Deep down in you, baby,
I drown just a little
Deep down in you

A stone in your river
Rolling to wherever
I drown just a little
I drown just a little
I'm a stone in your river
Every night I'm with you
I drown just a little
Deep down in you.
