MØ, Red Wine (ft. Empress Of)

don’t give a damn about the rumors
they have never bothered me
yeah and I might be a fool
but I am linkin’ what my eyes can see
and I am in love whit the rush
boy, whit the rush boy
that you make me feel
don’t give a damn about the rumors
yeah I prefer mystery

feeling like a loose leaf stuck on the tree
blowing in the wind come help me be free
like a shimmering stars all smiling at me
pour the red wine, red wine
feeling like a loose leaf stuck on the tree
blowing in the wind come help me be free
like a shimmering stars all smiling at me
and pour the red wine, red wine baby
and pour the red wine, red wine baby

I don’t care for the truth, boy
you can be who you please
I’ve had enough of reality
longing for the sweet relief
and I am in love whit the rush, boy
love whit the rush, boy
you wouldn’t believe
and right now we’re no one
so baby let’s breathe

all the girls around the world will say it
boy I need love, I need action, action
all the girls around the world will say it
ever craves a distraction, don’t you?

feeling like a loose leaf stuck on the tree
blowing in the wind come help me be free
like a shimmering stars all smiling at me
pour the red wine, red wine
feeling like a loose leaf stuck on the tree
blowing in the wind come help me be free
like a shimmering stars all smiling at me
and pour the red wine, red wine baby
and pour the red wine, red wine baby

I want a lick
I want live out all my fantasies
dance on every table till they’re mad at me
throw my hair back in the breeze
boy you’re right there whit me
should believe
gold summer breeze
throw your eyes at me
trying to spot me from flying but I won’t
no, no
pour a red wine

feeling like a loose leaf stuck on the tree
blowing in the wind come help me be free
like a shimmering stars all smiling at me
pour the red wine, red wine
feeling like a loose leaf stuck on the tree
blowing in the wind come help me be free
like a shimmering stars all smiling at me

and pour the red wine, red wine baby
and pour the red wine, red wine baby
