Martin Garrix, Summer Days (feat. Macklemore &

sshe looks good in the morning
and she don’t even know it
I don’t want you to go yet
can we stay in the moment

don’t look in the mirror
look into my eyes
when you see your reflection
you’ll see what I like

you look good in the morning
and you don’t even know it
I knew that

I got this feeing
on a summer day
knew it when I
saw her face
i just though that she could be the one
I got this feeing
on a summer day
knew it when I
saw her face
i just though that she could be the one

sundress with the with you on my arm
take the coupe out the garage
pull the roof back
just me you and the stars
toast to the Gods
she’s the one
a masterpiece
she a drug, got a fast relief
got me sprung
wrapped in sheets
wake up fuck
and then we going back to sleep

me and you on an island
with the ocean color stuck in you iris
we’re comfortable in silence
but I prefer when we wilding
sundress nothing underneath
as we undress
you could look in my eyes
see i’m some mess
couple of broken people
trying to complete each other
under one breath

don’t look in the mirror
look into my eyes
when you see your reflection
you’ll see what I like

you look good in the morning
and you don’t even know it
I knew that

I got this feeing
on a summer day
knew it when I
saw her face
i just though that she could be the one

I got this feeing
on a summer day
knew it when I
saw her face
i just though that she could be the one
