Efi, Good Enough for You (piosenka na Eurowizja

Shooting stars
- it's always been you I'd asked for
Heal the scars
that's all I've been begging for

can't get you
out of my sick mind
waiting here
till I cross the line

Tonight new spotlights burn my skin
another makeup seems so real
and I no longer know what's true
I wonder if I'm good enough for
you
I wonder if I'm good enough for
you

Counting steps
I swear it's just bad blood we've made through
Manifest
keep it low-key, it's just you I'm into

can't get you
out of my sick mind
stuck in here
till I cross the line

Tonight new spotlights burn my skin
another makeup seems so real
and I no longer know what's true
I wonder if I'm good enough for
you
I wonder if I'm good enough for
you

try me
never wanted their attention
no hype, no clout
try me
never wanted their attention
no hype
I wonder if I'm good enough for
you
