Elliphant, Step Down

I'm home, home alone
I call
Call again
You not answering
And I know
You couldn't, you wouldn't dare
To tell me how it is, you swear
You busy but I know you don't care
So don't cry man,
Cause I just wanted a friend tonight

You hot, I'm cold that's why I
That we could make a cloud run
You can't get no higher
Fuck you, you're not my type at all

Why don't you just step down?
Why don't you just step down from your high?
Was this from where you
Can't see a thing you miss
I don't so much mate
Why don't you just step down?
Why don't you just step down from your high?
Was this from where you
Can't see a thing you miss
I don't so much mate

You only flute all day
Never heard a word
Drippin' from your wacky
You got shit to say
And push it me
Don't think just
I own my emotions
Shit happens and I just still want a friend tonight

You hot, I'm cold that's why I
That we could make a cloud run
You can't get no higher
Fuck you, you're not my type at all

Why don't you just step down?
Why don't you just step down from your high?
Was this from where you
Can't see a thing you miss
I don't so much mate
Why don't you just step down?
Why don't you just step down from your high?
Was this from where you
Can't see a thing you miss
I don't so much mate

Say what
Jump down
Hey
So jump down

You hot, I'm cold that why I (why don't you just step down?)
Thought we could make a cloud run (why don't you just step down?)
You can't get no higher (you step down)
Fuck you, you're not my type at all (fuck you)
Why don't you just step down? (just step down)
Why don't you just step down from your high? (from your high)
Was this from where you

Can't see a thing you miss
I don't so much mate
Why don't you just step down? (step down)
Why don't you just step down from your high? (step down from your high)
Was this from where you
Can't see a thing you miss
I don't so much mate
