

# Cyrus Villanueva, Stone

I should have known  
From your voice alone  
That you're gonna mess me up  
Too much pleasure like a sugar rush

I should have guessed  
From those cherry lips  
That you're gonna leave your mark  
Never had a kiss that hits so hard

And I'm feelin' drifting over you  
You got this hold on me  
And you, yeah you make it hard to breathe  
But it just don't bother me  
But it just don't bother me

I'm a stone in your river  
Rolling to wherever  
I drown just a little  
I drown just a little  
I'm a stone in your river  
Every night I'm with you  
I drown just a little  
Deep down in you

I should've know watching you dance alone  
But I could never get enough  
Of your body looking like that, love

I could have guessed from your silhouette  
That we'll gonna rub real fast  
Oh, baby we can make it last

And I'm feelin' drifting over you  
You got this hold on me  
And you, yeah you make it hard to breathe  
But it just don't bother me  
But it just don't bother me

I'm a stone in your river  
Rolling to wherever  
I drown just a little  
I drown just a little  
I'm a stone in your river  
Every night I'm with you  
I drown just a little  
Deep down in you

I drown just a little  
Deep down in you, baby,  
I drown just a little  
Deep down in you

A stone in your river  
Rolling to wherever  
I drown just a little  
I drown just a little  
I'm a stone in your river  
Every night I'm with you  
I drown just a little  
Deep down in you.
