James Arthur, Ride

Baby just to ride with you
Ride with you, ride with you
Ride, baby just to ride with you
rRide baby all night
Baby just to ride with you
Ride with you, ride with you
Ride, baby just to ride with you
Ride baby all night

They think I have it all
You know my life ain’t perfect
You see what’s underneath
They see what’s on the surface
You get the best of me
They get a lesser version
I don’t wanna run away
But you know that I get nervous

Overdrive with the flashing lights
Got me feeling blind
Do or die!
Live a little I wanna feel alive
It’s been a while in another life
Wanna leave behind
Let’s get back to you and I

I’ve got my eyes wide shut
Driving through the night
And my lungs are filled with purple haze
I’m living it up
To get me out my mind
Cause it’s in blood rushing through my veins
I feel love when I hear them say my name
I’m living it up
But I’d leave it all behind

Baby just to ride with you
Ride with you, ride with you
Ride, baby just to ride with you
rRide baby all night
Baby just to ride with you
Ride with you, ride with you
Ride, baby just to ride with you
Ride baby all night
