

Dua Lipa, Cool

Guess I never had a love like this
Hit me harder than I ever expected
We been up all gooddamn night, all night, all night
Keep it going til we see the sunlight

And the color of the sky looking nice and nice
You know, you know, you know
Baby, I could see us in the real life
You know, you know, you got

You got me losin' all my cool
'Cause I'm burnin up on you
In control of what I do
And I love the way you move
We keep the heat in the grill
'Cause you're more than any pill
Never runnin' out of juice
When it's only me and you
You got, you got me losin' all my cool
I guess we're ready for the Summer

I like it better when we're intertwined
The way you touch me got me losin' my senses
Put your love, put your lips on mine, on mine
You got me working up an appetite, 'tite

And the color of the sky looking nice and nice
You know, you know, you know Baby,
I could see us in the real life
You know, you know, you got

Got me losin' all my cool '
Cause I'm burnin up on you
In control of what I do
And I love the way you move
We keep the heat in the grill
'Cause you're more than any pill
Never runnin' out of juice
When it's only me and you
You got, you got me losin' all my cool
I guess we're ready for the Summer

You got, you got me losin' all my cool
I guess we're ready for the Summer

Stand tight, touchin' your heaven, there's nothing better
I give it to you all night
You know, you know, you know
Got me losin' all my cool
And you like the way I move
In control of what I do
And my love makes you brand new

Got me losin' all my cool
'Cause I'm burnin up on you
In control of what I do
And I love the way you move
We keep the heat in the grill
'Cause you're more than any pill
Never runnin' out of juice
When it's only me and you
When it's only me and you
Hey
I guess we're ready for the Summer

You got, you got me losin' all my cool
I guess we're ready for the Summer
You got me, you got me losin' all my cool
