Justin Timberlake, Paradise (feat. 'N Sync)

Searched across the endless skies
Whoever thought I'd find someone like you
And even the test of time
No, nothing could divide
What's meant for you and I

Oh, we've been down a long, long road, now look at where we are
We were chasing after hopes and dreams, and we're still under the stars
And all this time, I've always wondered if it would feel the same
As it did when we were young and not afraid

'Cause I've waited
I've been waiting forever
Right here for this moment
Between you and I
Everything is happening
And it's just what I imagined
I imagined it would feel like
Paradise

I sailed across the endless sea
Just so I could be
Right here next to you (Right here next to you)
Right here next to you
Ooh, oh, 'cause when your heart's close to mine
I know God's plan is divine
And it's meant
For you and I, and I know

We've been down a long, long road, now we're looking where we are
We were chasing after hopes and dreams, and we're still under the stars
And all this time, I've always wondered if it would feel the same
As it did when we were young and not afraid

'Cause I waited
I've been waiting forever
Right here for this moment
Between you and I
Everything is happening
And it's just what I imagined
I imagined it would feel like
Paradise

I, you know I'd give anything to be your only one (Only one)
Just look at us, we're right here where we belong
And it was written
'Cause the stars said
I was yours and
You would be mine all along

And I don't mind waiting
I've been waiting forever (I)
Right here for this moment (This moment)
Between you and I (Between you and I, and everything)
Everything is happening
And it's just what I imagined
I imagined it would feel like

'Cause I waited
I've been waiting forever
Right here for this moment
Between you and I (Between you and I)
Everything is happening (Everything is happening)
And it's just what I imagined

I imagined it would feel like
Paradise

Paradise
