

# Eminem, For You Only

Ready to embrace the day  
As we both break,  
As the light stole in  
She found me wide awake.  
Wasted from a sleepless night  
I reach to touch your hair,  
Withdraw an empty hand  
For you're no longer there  
In between the silence, living is an empty space  
Save the ticking of the clock  
As the hands are sweeping past it's face  
And I just don't wanna be lonely  
(O no no)  
Night and day  
'Cos as I look around me I just feel that way  
(Repeat chorus)  
For you only  
I turn my hand to something that will clear my head  
But I cannot forget the parting words we shared  
I open up my mind to all the pictures I can trace  
But I cannot recall, the contours of your face  
And though we slipped away  
Before I had the chance to say,  
If I did something wrong  
Please tell me I'll accept the blame.  
And I just don't wanna be lonely  
(O no no)  
Night and day  
'Cos as I look around me I just feel that way  
(Repeat chorus)  
For you only  
For you only
