

Fais & Afrojack, Used To Have It All

You're looking at me
I'm looking back at you
Looking for answers
What are we supposed to do?

Stuck in a moment
And we can find our way out
Lost in a far memory
What is this about?

We used to have it all
The late nights on the beach
Running wild in the streets
Remember how we used to have it all
The whole world at our feet
The music through the beat
It's crazy how we used to have it all
The late nights on the beach
Running wild in the streets
Remember how we used to have it all

It's crazy how we used to have it all

You know I feel it
I know you feel it too
You've got my love
What are we waiting for?

Stuck in a moment
And we can find our way out
Lost in a far memory
What is this about?

We used to have it all
The late nights on the beach
Running wild in the streets
Remember how we used to have it all
The whole world at our feet
The music through the beat
It's crazy how we used to have it all
The late nights on the beach
Running wild in the streets
Remember how we used to have it all

It's crazy how we used to have it all

We used to have it all
Remember how we used to have it all
It all, it all, it all, it all...

It's crazy how we used to have it all
The late nights on the beach
Running wild in the streets
Remember how we used to have it all
The whole world at our feet
The music through the beat
It's crazy how we used to have it all

It's crazy how we used to have it all
