Tinashe, Company

What?

I don't need the loving, nope
So don't make this something
See, I'm nothing like a girlfriend, no!
I'm not like someone I'm supposed to be
And I just want some company, company, right?
And I just need some company, company
I just need some company, company
I just need some company, company

What?
Shout out to my booty
I'm straight up with this one boy, I know it
I call it when I stop feeling alone
I want it (I want it) and sometimes, see, I don't

I don't need no problems with nobody
I know how to get that, unfollow me
I just need a moment, fuck and leave
You could say you had it all, no strings

I don't need the loving, nope
So don't make this something
See, I'm nothing like a girlfriend, no!
I'm not like someone I'm supposed to be
And I just want some company, company, right?
And I just need some company, company
I just need some company, company
I just need some company, company

Companions, but we keep it even lower
I never ever been the type to do just show up
And you can't ever be the type of guy to just show up
Treat it like a meet and greet and then we go up
I don't need no problems with nobody (no!)
I know how to get that, unfollow me (no!)
I just need a moment, fuck and leave (no!)
You could say you had it all, no strings

Had it all
You could say you had it all
You could say you had it all
You could say you had it all
You could say you had it all
You could say you had it all
You could say you had it all
All babe
You're just my little side thing
Just a little sweet fling
Baby you don't have to buy things
I just want the high, supply me

I don't need the loving, nope
So don't make this something
See, I'm nothing like a girlfriend, no!
I'm not like someone I'm supposed to be
And I just want some company, company, right?
And I just need some company, company
I just need some company, company
I just need some company, company
