

Lawson, Under The Sun

Hey you where you been?
I don't know where to begin
Just follow me, I'll lead the way

Lets crash on the beach while we stop but the sea
We can throw ourselves into the waves

Lets get the wine flowing, fire burning
Lets get those heads turning high and set to blow
We'll keep the sun shining, love blinding
We'll keep the heat rising up and we're ready to go
Into the unknown

We don't need astrology
Grab your heart and follow me under the sun
We can move in symmetry
We can feel the energy under the sun

Deep down on the green I seen things i've never seen
Ain't no one gonna bring her down
We still got the night so lets keep this dream alive
We can take this feeling to the ground

Lets get the wine flowing, fire burning
Lets get those heads turning high and set to blow
We'll keep the sun shining, love blinding
We'll keep the heat rising up and we're ready to go
Into the unknown

We don't need astrology
Grab your heart and follow me under the sun
We can move in symmetry
We can feel the energy under the sun

Ready to go
Into the unknown

We don't need astrology
Grab your heart and follow me under the sun
Woo hoo
We can move in symmetry
Can feel the energy under the sun

Under the sun
Under the sun
