

Leepeck, One Step Down

I wish I was somewhere else
Out of this chaos in my women's hands
In the Moonlight I can see your face
I take one step down
To this lonely place

Your days are long
And my ones to
I wish I never forgot your truth
Look into the Sun
And I see you blind
I take one step down
To this lonely place

And I've been waiting on
The world to fall apart
And wish we all become
One of the shooting star

It's been a life
I've never choice
Lost in the middle of forgotten songs
But when I look in your eyes, my love
I take one step down
To see the sky above

And I've been waiting on
The World to fall apart
And wish we all become
One of the shooting star

Now I see skies filled with stars
Hanging over, sitting boulevard
The rain is coming
With the western clouds
I take one step down
To this lonely place

And I've been waiting on
The World to fall apart
And wish we all become
One of the shooting star
