

Little Mix, Happiness

Dancing alone in the dark
Shadows all over me
You messed with my heart too long
That was a big mistake
big mistake

got a smile on my face
love my reflection
in a better place
no longer stressing
about you

and i swear
i am never gonna lose my again

i was searching for happiness
i was using you to fill up my loneliness
reassured from the moment i set you free
i found the love, i found the love in me

you can't rain on my happiness
sometimes tears fall i must confess
but now i am standing right where i am meant to be
i found the love, i found the love in me

brand new evolution of me
ever since i let you go
finally i am learning things
i never knew before
never before

remember, i was mine
before i was yours
so don't try
i am stronger without you
without you

and i swear
i am never gonna lose my again

i was searching for happiness
i was using you to fill up my loneliness
reassured from the moment i set you free
i found the love, i found the love in me

you can't rain on my happiness
sometimes tears fall i must confess
but now i am standing right where i am meant to be
i found the love, i found the love in me
