

Major Lazer, Blow that Smoke (feat. Tove Lo)

blow the smoke
darkness bring out our emotions
mix em up with the night life potions
I loose my head for you
countless times we catch the sunrise
fix em scars we share with white lies
o loose my head for you

I got the keys to heaven now
baes all around and they got my mind spinning
suddenly doors just open wide

blow the smoke and let me love that fire
I don't need no memories
need is broken now I,, floating higher
this madness so good for me

so good for me

pretty pictures keep me dreaming
I loose my had for you
livin big but still deceiving
I loose my had for you
I;m in deep and I don't mind
I want that moment one of a kind

I got the keys to heaven now
baes all around and they got my mind spinning
suddenly doors just open wide
