

MØ, Diplo, Sun In Our Eyes

I feel the sunlight on my head
the scent of summer in my bed
when we were footprints in the sand
stealing liquor making plans

i can see your face from miles and miles away
but heaven knows it's gonna fade
heavens knows it's gonna fade

I'm a dog searching for reasons and a way
back to your hands
you make me tremble
made me crash
forget my name

and just ride that wave until we're higher than five
with the sun in our eyes
just ride on that cloud
until we fall from the sky
no tears for the night
for the night /3x
just ride that wave until we're higher than five
with the sun in our eyes

they said to watch out for your kind
I watched out and it blew my mind
they say romance makes you blind
well I'll be blinded for a life time

i can see your face from miles and miles away
I remember every kiss
and all the games you had me play

I'm a dog searching for answers and a way
back to your hands
you make me tremble
made me crash
forget my name

and just ride that wave until we're higher than five
with the sun in our eyes
just ride on that cloud
until we fall from the sky
no tears for the night
for the night /3x
just ride that wave until we're higher than five
with the sun in our eyes

i can see your face from miles and miles away
but heaven knows it's gonna fade
heavens knows it's gonna fade

I'm a dog searching for answers and a way
back to your hands
you make me tremble
made me crash
forget my name

and just ride that wave until we're higher than five
with the sun in our eyes
just ride on that cloud
until we fall from the sky
no tears for the night
for the night /3x

just ride that wave until we're higher than five
with the sun in our eyes
